Dan Brown er tilbage, hvor vi kender ham allerbedst - på en hæsblesende jagt gennem skjulte koder, religion, symboler og kunst. Hvor Browns populære hovedperson, professor Robert Langdon, tidligere har været udfordret af skjulte symboler i klassisk kunst, er det i *Oprindelse* en verden af moderne kunst, han bevæger sig ind i.

Her udfordres han af to grundliggende spørgsmål i menneskets historie. Spændingen er intens fra start til slut. Der er med andre ord al mulig grund til at glæde sig til en ny klassisk Brown-roman.

Med *Oprindelse* slår Brown en tyk streg under, at han er konspirationsteoriernes og cliff-hangernes mester. Få forfattere har så dedikerede og trofaste læsere som Dan Brown - og det skyldes ganske enkelt, at han ikke skuffer sine læsere: gang på gang rives man med af hans bøger, og han er således garant for tankevækkende spænding og underholdning.
